

## Panoramio Tutorial

Panoramio allows users to virtually visit the world through pictures. Just enter any location and stroll through the hundreds of available photos.

To get to the site, enter Panoramio.com into your URL bar on Internet Explorer.

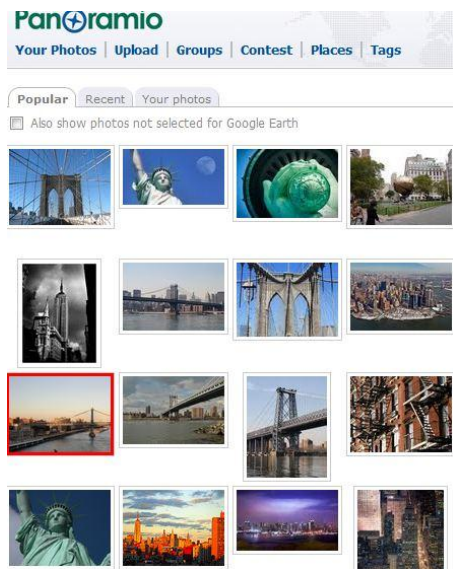

For this site, you don't need to register in order to use the site.

This is the Home page.

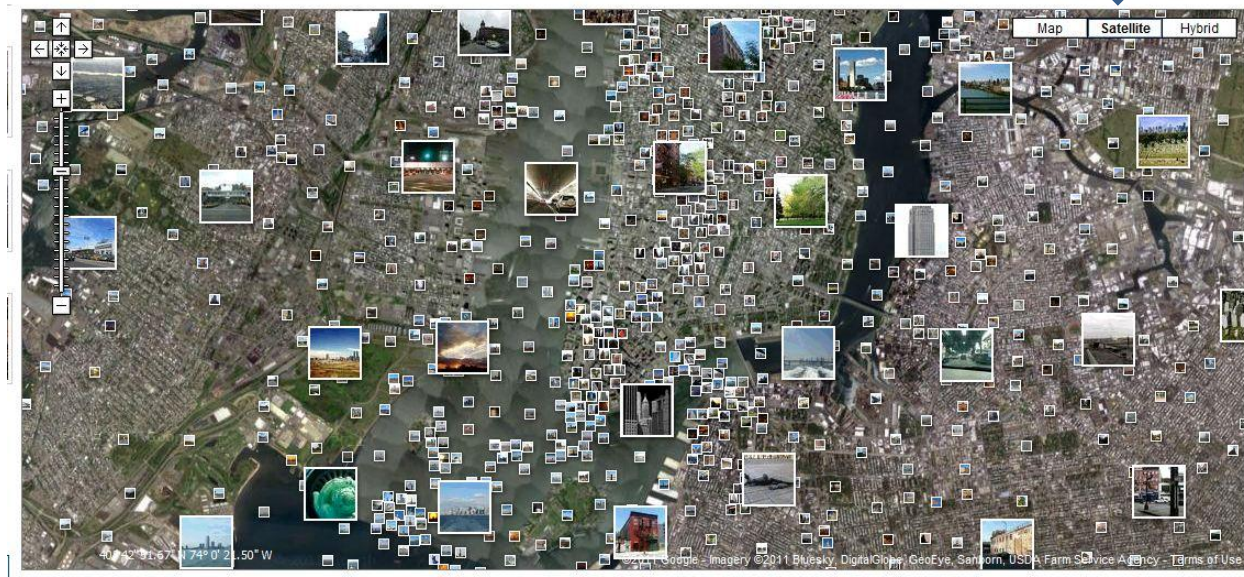

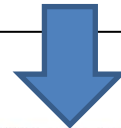

Search for any place in the world by putting the name in the search box and clicking search

Once Panoramio finds your location we will see:

A sample of the popular photos on the left, like these for New York City

And all the available photos on the right, like below. Each little square is a photo. You can change the view from a map to satellite...or a combination of both using hybrid.

By single clicking on the photos, you get a slightly larger view.

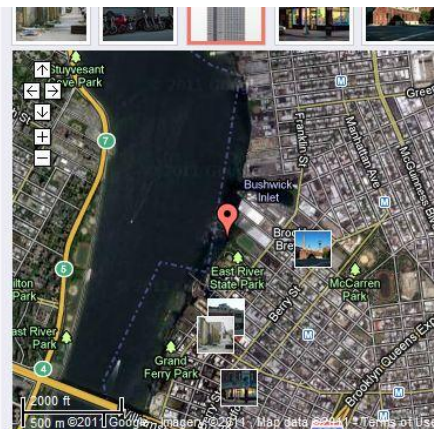

By double clicking you get a larger view with additional information about the location including longitude and latitude.
